CAREER OBJECTIVE

Full Stack Web Developer with 6+ years of experience building scalable web applications and AI-powered SaaS platforms. Specialised in Laravel, Next.js, and Vue/Nuxt, with production experience integrating OpenAI, Anthropic Claude, and Google Gemini into multi-tenant products. Strong background in payment infrastructure (Stripe Connect marketplaces, subscription billing, mobile money), real-time systems, and multi-language applications shipped to clients across the UAE, Saudi Arabia, Cameroon, Spain, and the Philippines. Experienced Shopify developer building custom Liquid themes, store setup, bulk catalog and inventory operations, and multichannel selling.

Experience

Full Stack Developer, NexaLance Oct 2025 - Present

- Lead full-stack delivery for international clients, owning projects end to end from requirements and PRD through architecture, build, deployment, and client handover.
- Architected and built **Ali Pro**, a multi-tool AI SaaS platform on Laravel 13 and Next.js 14, with a provider-agnostic AI layer over OpenAI, Anthropic Claude, and Google Gemini.
- Built **Wair**, a UAE peer-to-peer marketplace using Stripe Connect Express for split payouts and escrow, real-time messaging over Laravel Reverb WebSockets, and a bilingual English/Arabic RTL interface.
- Built **KmerBus**, a multi-tenant Cameroonian bus ticketing and parcel logistics PWA on Nuxt 4 and Laravel 13, integrating MTN Mobile Money and Orange Money.
- Set up Docker development environments, CI/CD pipelines, queue infrastructure (Redis, Horizon, Supervisor), and error monitoring across projects.

Full Stack Developer, SOFOF Tech Mar 2024 - Sep 2025

- Led development of scalable backend systems using Laravel, Vue.js, and Nuxt.js.
- Collaborated on system architecture, deployment, and maintenance.
- Notable Projects: qataratapp.com, prowhats.com, app.prowhats.com, app-meta.prowhats.com, sofoftech.com, Smart Execution Platform

Developer eXperience Hub Nov 2020 - Feb 2024

Full Stack Developer Mar 2023 - Feb 2024

Back End Developer Nov 2020 - Feb 2023

- Promoted from Back End Developer to Full Stack Developer after three years.
- Led development of scalable backend systems using Laravel and Vue.js; built and deployed several commercial applications and internal tools.
- Collaborated on system architecture, deployment, and maintenance.
- Notable Projects: sharparchive.com, skmobileschool.com, LiveCX, CXBrainstorm, OEHealth

Back End Developer, Tech2view Limited Jan 2020 - May 2020

- Developed backend modules and dashboards using Laravel and MySQL.
- Assisted in front-end integration using JavaScript, Bootstrap, and jQuery.
- Maintained legacy code and improved performance across various endpoints.

Technologies

AI & LLM Integration:

- OpenAI (GPT-4o, GPT-4o-mini, GPT-Image-1)
- Anthropic Claude (Opus, Sonnet), Google Gemini
- Provider-agnostic AI layer with vendor failover
- RAG pipelines, embeddings, semantic chunking
- Vector DBs (ChromaDB, Pinecone)
- Hybrid retrieval, BM25 reranking, query rewriting
- Prompt engineering & templating, relevance gating
- SSE token streaming
- AI cost control: spend caps, credit metering
- Document parsing & OCR (PDF, Tesseract)

Programming Languages & Frameworks:

- PHP 8.3 / 8.5 (Laravel 13, 12, 11)
- JavaScript / TypeScript
- Vue.js 3 / Nuxt 4, React 18 / Next.js 14
- Python (FastAPI)
- Golang (Basic to Intermediate)

Frontend Technologies:

- Next.js 14 (App Router, SSR / SSG)
- Nuxt 4 (SSR, SPA, PWA)
- Vue 3 (Composition API), Pinia, Inertia.js 2
- Tailwind CSS v4, shadcn/ui, Radix UI, Vuetify
- TanStack Query, React Hook Form, Zod
- i18n & RTL (Arabic, Spanish, French)
- GraphQL, WebSocket

Shopify & E-commerce:

- Custom Shopify theme development (Liquid)
- Custom sections, snippets, and blocks
- Store setup, theme customisation, app integration
- Bulk product import, inventory, collections
- Multichannel (Shopify and eBay), shipping and payment policy

Backend & API:

- Laravel (Eloquent, Sanctum, Passport, Queues, Jobs)
- Laravel Horizon, Laravel Reverb (WebSockets)
- Filament 3 admin panels
- RESTful API Design & Integration
- Custom JWT authentication (HS256)
- Multi-Tenant Architecture, RBAC
- Microservices (Basic understanding)
- API docs: Scribe, Swagger / OpenAPI

Payment Gateway Integration:

- Stripe (Checkout, Cashier, Connect Express)
- MTN Mobile Money, Orange Money, bKash
- MyFatoorah, HyperPay, PayTabs, MamoPay
- PayPal, Razorpay, Paystack, Mollie, Xendit

Database & ORM:

- MySQL 8, PostgreSQL 17, Redis 7 / 8
- Vector databases (ChromaDB, Pinecone)
- Database optimization & query tuning
- Eloquent ORM, Migrations, Seeders, Indexing

DevOps & Deployment:

- Docker & Docker Compose
- CI/CD pipelines (GitHub Actions)
- Cloudways, Laravel Forge, VPS, CPanel, CloudPanel
- Cloudflare R2 & CDN, AWS S3, Fly.io
- Queue workers (Horizon, Supervisor)
- Monitoring (Sentry, Telescope, UptimeRobot)
- Version Control: Git, GitHub, GitLab

Testing:

- PHPUnit / Pest (unit & integration testing)
- Vitest
- Postman / Insomnia for API testing
- Debugging & Optimization

Project & Team:

- Agile / Scrum, milestone-based delivery
- Requirements gathering & PRD authoring
- Direct client communication
- Team collaboration (cross-functional)

Cloud & Tools:

- AWS (S3, SES, hosting), Cloudflare
- Linux OS (comfortable with CLI, system setup)
- Jira, Trello (task management)
- Figma (for frontend collaboration)

Projects

Shopify Theme & Store Development

- **Role:** Shopify Developer
- **Stack:** Shopify, Liquid, HTML, CSS, JavaScript

  Built and customised Shopify storefronts with theme development in Liquid, writing custom sections and snippets for age verification, cart drawers with gift wrapping, countdown and flash-sale blocks, image comparison, product sliders, and a store locator. Also handled the operational side: bulk product import, inventory management, reusable upload templates for merchants to run their own catalogue, and multichannel selling across Shopify and eBay with matching shipping and payment policies.

Ali Pro - Multi-Tool AI SaaS Platform

- **Role:** Lead Full Stack Developer
- **Website:** ali-pro.com
- **Stack:** Laravel 13, PHP 8.3, Next.js 14, TypeScript, MySQL 8, Redis, Stripe

  A subscription AI platform offering 17 specialised tools, including document summarisation, legal document analysis, medical report generation, code assistance, image generation, and speech to text. Built a provider-agnostic AI layer that routes each tool to the right model across OpenAI, Anthropic Claude, and Google Gemini behind a single interface, so providers can be swapped without touching tool code. Implemented a credit-based wallet with Stripe subscriptions, top-ups, plan changes, and idempotent webhook processing, plus a cost-guard service enforcing per-provider monthly spend caps that blocks execution before any credit is charged.

Wair - Peer-to-Peer Fashion Marketplace (UAE)

- **Role:** Lead Full Stack Developer
- **Website:** wair.ae
- **Stack:** Laravel 13, Filament 3, Next.js 14, TypeScript, MySQL, Stripe Connect, Cloudflare R2

  A UAE marketplace connecting individual buyers and sellers, with Stripe Connect Express handling seller onboarding, commission splits, escrow, and automatic fund release 48 hours after delivery. Implemented real-time buyer-to-seller messaging over Laravel Reverb WebSockets with web push notifications, a multi-stage dispute and partial-refund workflow, and a Filament admin panel for operations. Delivered in English and Arabic with full RTL support, serving listing images through Cloudflare R2 and CDN.

KmerBus - Intercity Transport & Parcel Logistics PWA (Cameroon)

- **Role:** Lead Full Stack Developer
- **Website:** kmerbus.com
- **Stack:** Nuxt 4, Vue 3, Tailwind v4, Laravel 13, PHP 8.5, PostgreSQL 17, Docker

  A multi-tenant platform for Cameroonian bus operators covering seat-map ticket booking, QR-coded tickets, and parcel delivery. Integrated MTN Mobile Money and Orange Money, the dominant payment rails in that market, alongside an offline cash-desk mode so station agents can sell tickets without customer internet access. Implemented a five-stage photo-proof parcel delivery chain, a seven-role permission system, and a financial ledger with refund handling, delivered as an installable PWA in French and English.

OposChat - AI Study Assistant for Spanish Public-Sector Exams

- **Role:** Full Stack Developer (freelance)
- **Stack:** Laravel 12, Vue 3, TypeScript, Inertia.js 2, MySQL 8, ChromaDB, Python FastAPI, OpenAI, Gemini

  A retrieval-augmented AI tutor that answers candidate questions strictly from an uploaded legal and course document corpus. Built the full RAG pipeline: ingestion with semantic and legal-structure-aware chunking, embedding storage in ChromaDB through a Python FastAPI bridge, and hybrid retrieval combining vector similarity with BM25 reranking and query rewriting. Designed a four-stage relevance gate that refuses off-topic questions without ever calling the language model, cutting wasted API spend and preventing hallucinated answers. Added SSE token streaming, AI-generated quizzes, rubric-based automated grading, and an adaptive engine tracking weak subtopics per student.

My Math Olympiads - Online Mathematics Examination Platform

- **Role:** Full Stack Developer
- **Stack:** Laravel 12, Next.js, MySQL, Redis, Stripe, JWT

  An examination platform for mathematics competitions with a drag-and-drop question builder, LaTeX equation authoring and rendering via MathLive and MathJax, timed exams, automated grading, and generated PDF certificates. Implemented role-based access for students, teachers, and administrators, bulk question import and export through Excel, Stripe payments, and Swagger API documentation.

Qatarat App - Water Delivery Platform for Mosques

- **Role:** Full Stack Developer
- **Website:** qataratapp.com
- **Stack:** Laravel, Vue.js, Nuxt.js, MySQL, REST API

  Developed and maintained APIs for the client and driver mobile applications as well as the admin panel. Integrated advanced booking, real-time notifications, and live tracking, working closely with mobile developers to ensure seamless API communication.

ProWhats Ecosystem - WhatsApp Business Automation

- **Role:** Backend & API Developer
- **Websites:** prowhats.com, app.prowhats.com, app-meta.prowhats.com
- **Stack:** Laravel, MySQL, Vue.js, Laravel Forge

  Engineered scalable backend services on a multi-tenant architecture for WhatsApp business automation, with APIs for chatbot integration, automated responses, and communication workflows.

Smart Execution Platform - B2B Management System

- **Role:** Backend & API Developer
- **Stack:** Laravel, Vue.js, MySQL, REST API

  A B2B management system covering team collaboration, file sharing, and project execution. Responsible for API design, payment gateway integration, and role-based access control to ensure secure and efficient operations.

SharpArchive - Email Archiving & Compliance SaaS

- **Role:** Backend Developer
- **Website:** sharparchive.com
- **Stack:** Laravel, Vue.js, PostgreSQL, REST API

  A SaaS platform to monitor, capture, and securely store emails and digital communications for finance, education, and government sectors under data retention regulations.

YouWannaTrade - Buy, Sell, Trade & Auction Marketplace

- **Role:** Full Stack Developer
- **Stack:** Laravel 13, Livewire 4, Filament 5, PostgreSQL 16, Redis, Horizon, Docker

  A one-stop marketplace to buy, sell, trade and auction. The listing schema runs on PostgreSQL JSONB with a GIN index and generated columns across fourteen categories, with matching between listings and trade preferences, offers, messaging, dealer profiles, and a Filament admin panel.

Termometro Social - Real-Time Public Opinion Platform (Spain)

- **Role:** Full Stack Developer
- **Website:** eltermometrosocial.com
- **Stack:** Laravel, Next.js, PostgreSQL, pgvector, WebSockets, Docker Compose

  Reads the Spanish press continuously, groups every article covering the same event, writes one neutral for / against question per topic, and shows how the country answers in real time, with the API, news pipeline worker, and websocket server as separate processes.

BikriBondhu AI - AI Sales & Support Agent SaaS (Bangladesh)

- **Role:** Full Stack Developer
- **Stack:** Laravel 13, Inertia.js 3, Vue 3, Nuxt 4, PostgreSQL, Redis, Horizon, Reverb

  A multi-tenant conversational commerce SaaS for Bangladeshi small businesses and F-commerce sellers, with a Super Admin panel, Merchant panel, Live Inbox, and a separate public site.

One Night Guest - Event Venue & Services Classifieds (Mexico)

- **Role:** Full Stack Developer
- **Website:** onenightguest.com
- **Stack:** Laravel 12, Inertia.js 2, Vue 3, Cashier, Reverb, OpenAI, Google Ads API

  A Spanish-first advertising platform for event venues and services, running on advertiser subscriptions with part of each fee funding a Google Ads campaign, plus map search, identity verification, and a sales pipeline for prospect ads.

OushodhKhata - Pharmacy Management SaaS (Bangladesh)

- **Role:** Full Stack Developer
- **Website:** pharmacy.sohojitbd.com
- **Stack:** Laravel, Inertia.js, Vue 3, PostgreSQL

  A multi-tenant SaaS for independent pharmacies covering sales, purchases, batch-wise stock, expiry tracking, and stock count discrepancies, with each pharmacy isolated through PostgreSQL row-level security, in Bangla and English with thermal receipt printing.

AI Data Insight - Location-Based Marketing SaaS

- **Role:** Full Stack Developer
- **Stack:** Laravel 10, Nuxt 3, Vue 3, Sanctum, Docker

  A multi-tenant SaaS for campaigns triggered by customer location events, integrating the CAMARA geofencing API (Orange and Telefonica) with a 3-legged OAuth consent flow, QR codes, queue-based event processing, and email campaigns with A/B testing.

DreamCrowd - Multi-Sided Services Marketplace

- **Role:** Full Stack Developer
- **Website:** dreamcrowd.com
- **Stack:** Laravel 11, Stripe, Pusher, Spatie Permission, MySQL

  A marketplace for online and in-person service bookings with recurring classes and custom offers, handling Stripe payments, commissions, multi-currency pricing, disputes with refunds, and an automated order lifecycle.

DailyDeals - Community Deals Platform (Philippines)

- **Role:** Full Stack Developer
- **Website:** dailydeals.ph
- **Stack:** Laravel 12, MySQL, Tailwind CSS, Reverb

  A community deals platform with a hot ranking algorithm, nested comments with reporting, social sign-in, store subscriptions, and affiliate click tracking.

FurniFlow - Furniture Business Operating System (Bangladesh)

- **Role:** Full Stack Developer
- **Stack:** Laravel 13, Inertia.js 3, Vue 3, Tailwind 4, Docker

  Covers designs, quotations, orders, production stages, work orders, carpenter attendance and wages, deliveries, expenses, and multiple branches for furniture shops and workshops.

Pangsha HMS - Hospital Management System (Bangladesh)

- **Role:** Full Stack Developer
- **Stack:** Laravel 13, Inertia.js 2, Vue 3, DomPDF, Docker

  Covers patients, doctors, appointments, OPD visits, prescriptions, service packages, invoices, and payments, with role-based access and generated PDF documents.

Shopify Stores - Big Boys Clothing Co (US) and 7to9 Parts (Australia)

- **Role:** Shopify Developer
- **Website:** bigboysclothing.com, 7to9parts.com.au
- **Stack:** Shopify, Liquid, JavaScript, Python, eBay

  Rebuilt a store so customers reach their town's shirts in three taps through 15 county boxes, and delivered model-based collection filters with Python scripts that build Shopify, eBay, and inventory import files.

Federal Services Framework - Federal RFQ Platform

- **Role:** Full Stack Developer (team)
- **Stack:** NestJS, Next.js, PostgreSQL, Anthropic Claude, Google Cloud

  A microservices platform for federal RFQs, vendors, and quotes with SAM.gov integration and AI document extraction. Worked in a team on vendor quotes, vendor management, and the frontend.

Sage SEO - AI Search & Content Platform

- **Role:** Full Stack Developer (team)
- **Website:** sageseo.ai
- **Stack:** Laravel 10, Nuxt 2, Stripe, Google Cloud

  An AI content and SEO platform covering keywords, content briefs, article generation, and publishing, with agency accounts and Stripe billing. Worked in a team on the Nuxt frontend and the Laravel API.

UltraPlayer - Video Player SDK

- **Role:** Developer
- **Stack:** TypeScript, hls.js, dash.js

  A video player SDK with YouTube-style controls, HLS and DASH adaptive streaming, picture-in-picture, subtitles, a theming API, and watch time analytics.

Education

Kushtia Polytechnic Institute: Diploma in Engineering Mechanical — 2015 to 2018

- **GPA:** 3.68 / 4.0

Language Certificate

- Bangla: Native
- English: Proficient
